
SOURABH SHEOKAND

sheokand.sourabh.anil@gmail.com | +91 930-649-0337 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Backend and systems developer with strong foundation in C, C++, and Python. Experience building production REST APIs, concurrent systems using shared memory IPC, and performance-oriented backend services. Proficient in Docker, CI/CD pipelines, database design, authentication systems, and automated testing. IIT JAM qualified Physics postgraduate with strong quantitative problem-solving background.

Core Competencies: Backend Development, API Design, Concurrency, Linux Systems, Database Optimization, Test-Driven Development, Automation

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Fortran, C, C++

Backend: Django, Django REST Framework, Express.js, Node.js, REST APIs, JWT Authentication

Systems: Shared Memory IPC, POSIX Semaphores, Signal Handling, Linux, Bash, Multithreading

Databases: PostgreSQL, MongoDB, SQLite

DevOps: Docker, GitHub Actions CI/CD, Git, Render, Gunicorn, Nginx

Testing & Tools: Zod, Vitest, pytest, Pino, WebSockets, Arduino, Raspberry Pi

WORK EXPERIENCE

HEXAHEALTH

Jan 2025 – Present

Executive

Gurugram, India

- Identified manual inefficiencies in doctor profile creation workflow and self-built a JavaScript browser extension automating multi-field data entry in a React-based CMS, reducing task time by 70%
- Independently developed a Python data aggregation pipeline integrating with third-party REST APIs to collect, normalize, and process healthcare provider records, replacing manual online research across multiple sources
- Modified internal CMS React components to support custom workflows and business rules not available in the base system, despite no engineering mandate – solution adopted by team

PROJECTS

Todo App Backend TypeScript, Node.js, Express.js, MongoDB, Docker github.com/sourabh945/todo-list

- Built production-grade REST API with JWT authentication, schema validation using Zod, structured logging with Pino, and sensitive data redaction
- Implemented centralized error handling architecture covering CastError, ValidationError, and DuplicateKey scenarios
- Wrote comprehensive test suite using Vitest and mongodb-memory-server with Docker-based local development and graceful shutdown handling

BlogSite Python, Django, PostgreSQL, CI/CD github.com/sourabh945/blogsite

- Developed Django application with LLM-powered tag generation via Cohere API and personalized feeds using tag-matching queries
- Implemented CI/CD pipeline using GitHub Actions with PostgreSQL service container and automated deployment to Render

Hydrogen Molecule Ion Simulation Fortran, Python github.com/sourabh945/Hydrogen-Molecule-Ion-Sim

- Solved ground state electron wave function of H_2^+ using numerical Shooting Method and rendered high-resolution 3D orbital visualizations and full analytics of electron energy states and stability

Third Eye – Assistive Navigation Device Python, Arduino, Raspberry Pi github.com/sourabh945

- Built embedded hardware and software system achieving $59\mu s$ response time using ultrasonic sensors and vibration feedback, with voice-assisted navigation on Raspberry Pi

Other: [DataKeeper](#) – automated Google Drive backup (25% faster) | [XAnalyser](#) – X-ray diffraction lattice calculator | [Quickfolio](#) – portfolio site from JSON configuration

EDUCATION

Guru Jambheshwar University of Science and Technology

Aug 2022 – June 2024

M.Sc. Physics – Specialization: Material Science

Marks: 69% Hisar, Haryana

ACHIEVEMENTS

- IIT JAM Qualified** – national-level postgraduate entrance examination in Physics
- Winner, Inter-University Advanced Mathematics Quiz
- Best explainer Award – State Level Science Exhibition and 3-year member of competitive Science Quiz team
